

THE SAUER 303
FINE. FAST. FIRST.

When beaters are shouting and dogs are barking while shortly after boars are rushing out from underneath the thicket, it is time for the semi-automatic rifle S 303.

Our S 303 combines a classy appearance with utmost efficiency and like a double rifle, provides the safe follow-up shot without manual reloading. Yet, this rifle has even more to offer: The semi-automatic mechanism reduces recoil and muzzle rise by almost 30 percent while the precision remains unerring at all times. This makes the S 303 the unchallenged queen of hunting.

SAUER 303

IN A FLASH

Integrated in the buttstock of your rifle, the Mini Universal Key (MUS) appears at first glance to be no more than a detachable sling swivel. Upon removal, it is revealed to be a super stable allen key with which the fore-end and buttstock can be dismantled in a flash without using any other tool. This is not only brilliant while traveling, but also when the rifle gets dirty on a driven hunt and quickly has to be cleaned.

OPTIMISED DESIGN ON THE INSIDE AND OUTSIDE

The S303's completely redesigned system turns the new semi-automatic rifle into a reliable and controllable hunting companion.

PROTECTED AGAINST DIRT

The hard chrome-plated bore provides a durable protection against corrosion. This enhances the lifetime of your S 303, given that the rifle is cleaned regularly within the necessary intervals.

BLACK MAGIC TRIGGER

Adequate trigger pull for driven hunts, breaks like glass with accurate long-range shots: Breathtaking 950 g trigger pull weight make the S 303 a perfect companion for any hunting situation.

SAUER 303

EASILY COCKED

As with the S 404, the S 303's ergonomically perfect and smooth metal cocking slide on the bolt shroud also allows the rifle to be cocked both comfortably and extremely silent. By pressing the button with the thumb, the cocking slide silently slides back into the uncocked position. In addition it is also possible to load and unload the rifle in the uncocked position: To do so, simply tap the cocking slide and safely open the S 303.

EXCELLENT RELIABILITY

Its optimised gas operation ensures the S 303's excellent reliability and long service life. Its steel construction additionally provides the rifle's desired top-heaviness and thus ensures optimum swing characteristics when shooting at moving game.

ONE FOR ALL

From now on, the S 404's proven and return to zero Sauer Universal Mount (SUM) also is the measure of all things on the new S 303. This ensures that the shooter can focus on the target at lightning-fast speed and does not need to lift his head in order to use the full potential of accuracy. The SUM is available for all common mounting rails as well as for all ring diameters from 1 inch to 40 mm.

PERFECTLY SAFE

The proven and popular magazine lock MagLock now also secures the magazine of the S 303. Thanks to its optimum position, it does not only prevent unintentional magazine loss, but literally is unlocked at one single stroke when a new magazine must be available rapidly.

S 303 SELECT

Ergonomics in classic design: The new S 303 now also comes with a wooden stock boasting an elegant and striking laser line grain. The basic version of the new Sauer semi-automatic rifle is the most elegant entry into the world of efficient hunting.

S 303 ARTEMIS

The first semi-automatic rifle that is completely tailored to female hunters does not compromise: shorter buttstock, modified cast and a slim pistol grip. For the efficient hunting of hoofed game.

S303 CLASSIC XT

Thanks to its ultra-rugged synthetic stock, the S303 Classic XT is the all round semi-automatic rifle for ambitious hunters – for every kind of hunting and in any weather.

S 303 SYNCHRO XT

With its robust and ergonomically sophisticated thumbhole stock and adjustable comb, the S 303 Synchro XT impressively proves that an elegant hunting rifle does not necessarily need a wooden stock.
